SECURITY REPORT · NOVEMBER 2026

Example Company

example.com | Tier 1 profile | Cloud data | Prepared November 22, 2026

AT A GLANCE

Target 75 · **On target**

Example Company meets 10 of the 10 controls in its Tier 1 profile.

Nothing needs attention.

10	0	0	0
Met	Need attention	Documented decisions	Not measured yet

AGAINST EACH STANDARD

Tier 1 YOUR PROFILE	10 met	100
Tier 2	11 met · 2 partly met · 2 not measured	95
CMMC Level 1	18 met · 3 partly met · 2 not met · 2 to confirm · 7 not measured	83
HIPAA	14 met · 3 partly met · 2 not met · 6 not measured	82

Each score is out of 100, over the controls that can be measured. The mark on your profile's bar is your target.

WHAT YOUR SECURITY TOOLS DID

10,587 Emails scanned — Last 90 days	**337** Phishing emails caught — Last 90 days	**2,717** Spam emails blocked — Last 90 days
4 Threats detected on computers — Last 30 days, 7 devices covered	**1 of 1** Machines with healthy backups — Axcient BCDR	**0%** Completed security training — Last 3 months

01 Moving up to Tier 2

Tier 2 is for a higher threat category: stronger defenses and tighter controls. This is what it would add for you.

HIGH

Advanced email threat protection (phishing, impersonation, incident response)

It catches phishing and impersonation that basic filters miss, and deals with reported emails quickly.

PARTLY IN PLACE

MEDIUM

Session lifetime and Continuous Access Evaluation

Shorter sessions and continuous checks cut off a stolen session, or someone who has left, quickly.

PARTLY IN PLACE

IT ALSO ASKS FOR THESE, WHICH CAN'T BE MEASURED YET

HIGH Data loss prevention for personal, financial and health data

MEDIUM Self-service password reset and smart lockout

02 What's in place

10 controls met, each checked at the source.

- Legacy authentication disabled
  Checked in Microsoft 365
- MFA enforced for all users
  Checked in Microsoft 365
- Email authentication (SPF, DKIM, DMARC at reject)
  Checked in DNS
- Malicious attachments blocked (anti-malware filter and risky file types) (L)
  Checked in Microsoft 365 and IronScales
- Endpoint protection (EDR) on every computer
  Checked in ThreatDown
- Cloud data backed up (Microsoft 365 or Google Workspace)
  Checked in Axcient
- Dedicated admin accounts and Global Administrator count
  Checked in Microsoft 365
- Mailbox auditing and Unified Audit Log ingestion
  Checked in Microsoft 365
- SharePoint and OneDrive external sharing limits
  Checked in Microsoft 365
- Outbound auto-forwarding disabled
  Checked in Microsoft 365

03 What your security tools did

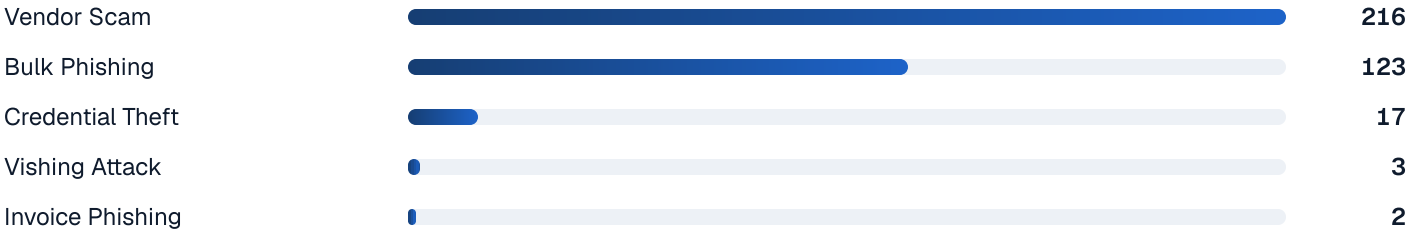

The work behind the controls, as each tool reports it.

Email security

IRONSCALES · last 90 days · as of Nov 21, 2026

10,587 Emails scanned	**337** Phishing caught	**2,717** Spam blocked
38 Impersonation attempts	**140** Incidents 92% resolved automatically	**63** Hours saved on incidents

PHISHING BY TYPE

MONTH	SCANNED	PHISHING	SPAM BLOCKED	IMPERSONATION
Sep 2026	53	1	0	0
Oct 2026	6,152	173	1,590	14
Nov 2026 (so far)	4,383	163	1,127	24

Most targeted in the last 30 days: Avery Garland (4), Tom Fisher (2), Sara Whitfield (2), Lena Carter (85), Orders (3), Dana Fisher (121).

In the last 7 days: 1,323 emails scanned, 73 phishing caught and 384 spam blocked.

Security awareness training

IRONSCALES · last 3 months

8 People enrolled	**13%** Took a phishing simulation 1 person	**0%** Completed training 0 people

High risk **2** Medium risk **6** Low risk **0**

3 users · 16 SharePoint sites backed up; 3 users selected of 3 active

MACHINE UNDER BCDR	HEALTH	NEWEST RESTORE POINT
Server3 workstation	NORMAL	Nov 22, 10:18 AM

How this report works

Nexus, Enuclea's management console, checks each control automatically against your Microsoft 365 tenant, your domain's DNS and the security tools Enuclea runs for you. Your profile is Tier 1, and your data lives in the cloud (Microsoft 365 or Google Workspace).

The score weighs each control by importance: critical 5, high 3, medium 2, low 1. A control that's partly met earns half. Controls that don't apply, documented exemptions and controls that can't be measured yet are left out.

(L) marks a light assessment: it meets basic hygiene, not the intent of CMMC Level 1 or HIPAA.
